Subject: Lead in drinking water in Newark nj schools

Yesterday Region 2 was contacted about high lead levels in over 35 public schools in Newark. We are in a support role to nj dep. we have been on calls today with the state and school district and provided the EPA recommended testing protocol. I spoke with the nj env commissioner today and he may request our technical assistance with private companies which will come to the schools this week to test which we can do. We have briefed the congressional offices and Mary Mears checked in with nj dep press office. Bottled water should arrive in schools starting Tomorrow. School district will make a public announcement Tomorrow. Doug MCKENNA point person for staff. Call with any questions. Judith
